

Surveillance Animals Tested in West Virginia

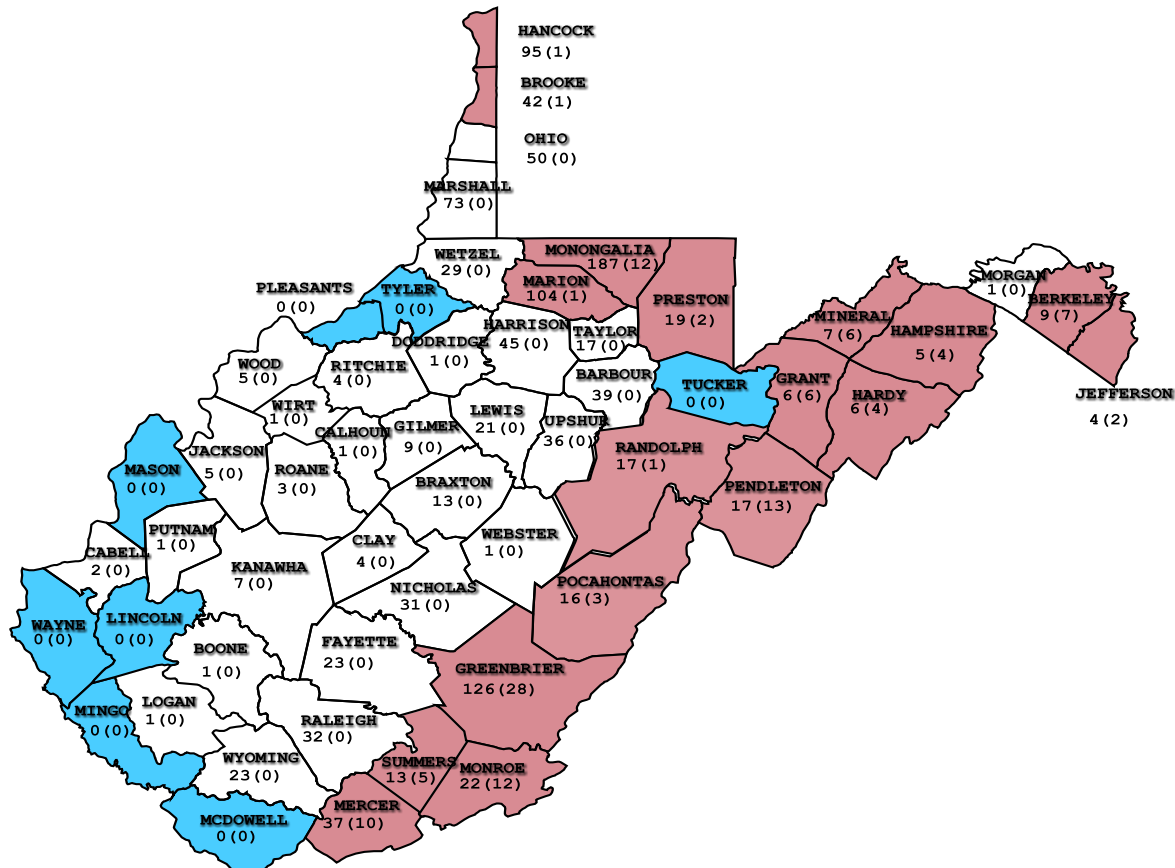

(Raccoons, Skunks, Foxes, Coyotes)

**Total Surveillance Animals
Tested: 1211**

(Includes USDA Data)

**Total Surveillance Animals
Positive: 118
(Raccoon Strain Rabies
Only)**

Number Tested vs. Number Positive
January 2011 – December 2011

(#) = Number Tested (Number Positive)

0 Positives Reported

1 or More Positives Reported

No Surveillance
Animals Tested

The content of the above map depicts the number (by county) of surveillance animals (defined as raccoons, skunks, foxes or coyotes) that were tested for rabies and the number of those that tested positive for raccoon-strain rabies. Data represents samples processed by the WV Office of Laboratory Services and from USDA Wildlife Services, 1/1/2011 through 12/31/2011.

Note: All positive rabies results reported by USDA Wildlife Services are documented preliminarily as raccoon-strain rabies, pending CDC confirmation
